- Custom-made items

## Everything under the roof

- Components
- Development
- Manufacture
- Projects

Tron is an exclusively Czech company with a longtime tradition and position on the electrical components, LED diodes and LED accessories market since 1997.

Thanks to our longtime experience, know how and business relations, we provide LED components and solutions that are modern, high tech and affordable at the same time.

We are technically advanced; we focus on maximal quality and universal applicability. We constantly pursue the latest trends in the branch and, according to our experiences, update and expand our offer and the company know how, which leads to raising the standards and range of our services.
